NOTE: Robert B. Platt, a privet surveyor, surveyed four(4) small parcels of land in Section 32 in 2006. His survey was based on the "State of Utah Exchange Patent No. 19220, Parcel No. 404", recorded in the San Juan county office 12-28-1998.

The survey was executed in accordance with the specifications set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions for Group No. 1026, dated September 22, 2006.

The true meridian direction and length of all lines were determined by the Global Positioning System (GPS) utilizing Real-Time Kinematic (RTK) observations using the Trimble 5700 model receiver.

Preliminary to the resurvey, the lines of the original survey were retraced and a diligent search was made for any evidence of the original field note record. Identified corners were remonumented in their original positions; lost corners were restored and monumented at proportionate positions based on the original record. The retracement data were thoroughly verified and only the true line notes are given herein.

The geographic position, in NAD83 (CORS96), epoch 2002.00, for Mile Post 219 on the Utah - Arizona State Boundary Line, was determined by

TOWNSHIP 43 SOUTH, RANGE 16 EAST, SALT LAKE MERIDIAN, UTAH

GPS observations to a network accuracy of less than 0.10 meters, 95 percent confidence circle, as defined in the Standards and Guidelines for Cadastral Surveys Using Global Positioning System Methods, May 9, 2001, Version 1.0, is as follows:

Latitude 36° 59' 53.978" N., Longitude 110° 05' 38.439" W., N.A.D. 1983, N.A.V.D. 1988, Elevation: 5253.9 Ft.
